** Product may be painted. If you choose to paint the P300 Series cellular PVC railing, we recommend you use a premium grade acrylic paint with solar reflective pigment and one specifically for use with PVC products. Due to the expansion and contraction characteristics of PVC, P300 Series products should only be painted colors with an LRV (Light Reflective Value) greater than 55. The use of darker colors may cause damage due to excessive expansion or contraction and will void the product warranty.

***To select the best transformer (page 76) for your installation, multiply the wattage usage of each fixture by the quantity of fixtures to be installed to calculate your total wattage requirement. The wattage rating of the transformer must be greater than the sum of the fixture wattage begin installed.**

****All of these fixtures can be continuously daisy chained in any order with the exception of the Strip Light (I), which cannot be daisy chained and must be used with a 2 in 1 splitter (page 76) at the end of the chain.**
