

Acrylitex®

Tilt UP Primer

Precast and Poured Concrete

**Primes precast and poured concrete,
and other masonry surfaces**

**Features excellent filling of small voids
and cracks**

**Provides superior adhesion, and
excellent hide and coverage**

Alkali resistant from 8 to 13 pH

**Meets FHA and VA specifications as a
first coat, or primer on concrete poured
or precast surfaces**

**Mildew Resistant to inhibit the topcoat
of paint from growth of mildew**

Acrylitex Tilt UP Primer is an outstanding ready to spray, full bodied primer filler that features excellent filling of small voids and cracks on precast and poured concrete and masonry substrates. It meets or exceeds FHA and VA specifications as a first coat, or primer on concrete poured or precast surfaces. It provides superior adhesion, and excellent hide and coverage. Applies easily and dries to hard finish. May be topcoated with latex or oil paint products.
