RE: GRABBER DECKMASTER BRACKETS

Grabber hereby certifies that both our G-90 galvanized with Powder Coating and our 304 Stainless Steel brackets meet the requirements to be ACQ compliant. These brackets, in conjunction with our GRABBERGARD coated and Stainless Steel Fasteners, allow you to offer your customers a choice in ACQ compliant hidden fastening systems. The Stainless Steel System is recommended for robust corrosion environments such as marine and coastal industrial areas. The Deckmaster Powder coated brackets will meet the needs for all other environments.

Sincerely yours,

Doug Holmberg
