A300 RAILING INSTALLATION OPTIONS

Post to Post (PTP)

POST TO POST - PTP

A300 PTP application method is the traditional installation method where the rail terminates into the face of posts.

Over The Post (OTP) Surface Mount

OVER THE POST - OTP

A300 OTP application method provides clean uninterrupted run of the top rail using a wide variety of OTP top rail brackets that are designed to insert into the top of the posts.

Over The Post (OTP) Side/Fascia Mount

OVER THE POST - OTP
SIDE/FASCIA MOUNT

A300 OTP Side/Fascia Mount application method installs on the outside band of your structure to address design and structural considerations while making use of every inch of your outdoor space.

POST MOUNTING OPTIONS

3-1/2"
FLANGED POST1-7/8" SURFACE
POST MOUNT4" SURFACE
POST MOUNTSIDE/FASCIA
POST MOUNT

Shown with a 1-7/8" post sleeve and installed on deck side.

STAIR RAIL OPTIONS

MULTI-PITCH STAIR
5° - 38° ANGLE ADJUSTABILITY

Swivel baluster connector installs in rail channel allowing for a wide range of pitch angles.

No angle cutting required.

FIXED-PITCH STAIR
30° - 34° ANGLE ADJUSTABILITY

No angle cutting required.

Designed to eliminate complex and time consuming miter and angle cuts.

Fence to Wall Mounts

Item Description	White	Khaki
2" x 3-1/2" Rail Wall Mount * Screws not included, order 904047 or 905050	901209 \$4.80	905644 \$5.76

Rail wall mounts are optional and are offered for applications where routed fence posts cannot be used.

Secure, define and accent the area around your pool without being obtrusive.

- 1-3/8" Square Pickets
- Varying heights, widths and picket spacing available to accommodate your preference for privacy or accent
- Built to ICC code standards for security and compliance
- Matching gates available - call for gate pricing and specifications

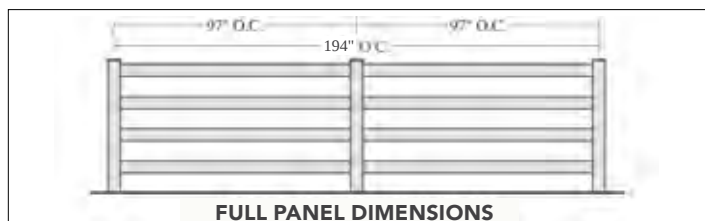

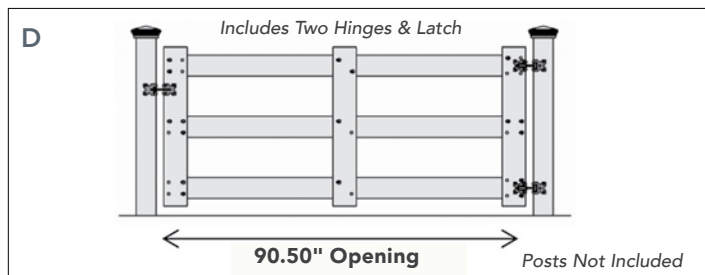

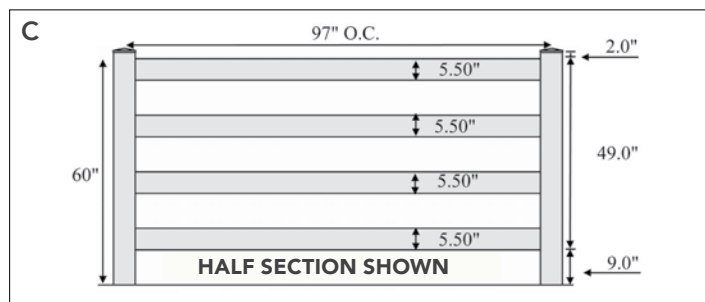

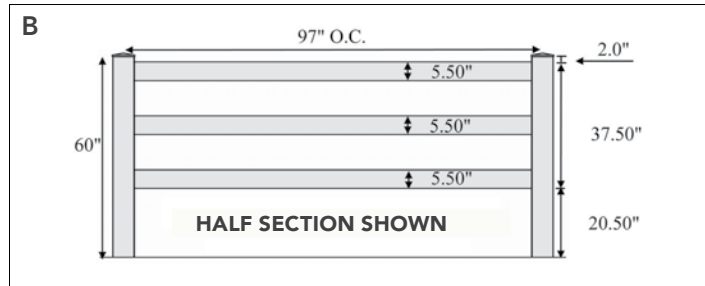

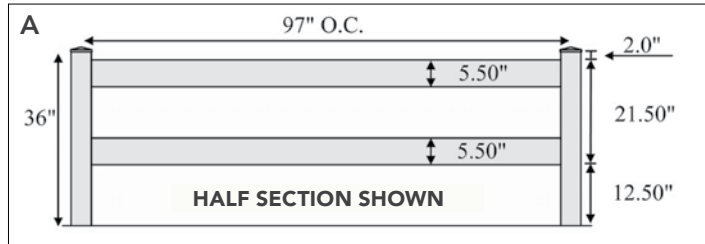

White Vinyl Picket Fence

Custom order fence is made specifically to order - Custom order fence material can not be returned.

All dimensions are for reference and nominal.

Vinyl Fence - Post & Rail

Great for accenting corners or defining an area around your field, ranch or farm.

- 2-Rail / 36" height
- 3-Rail / 60" height (Most Popular)
- 4-Rail / 60" height
- Durable webbed rail for toughness & added strength

When using for stock animal containment Post & Rail fence must be used in conjunction with an electric wire or ribbon fence.

HORIZONTAL CABLE RAILING SYSTEM

FAIRWAY HORIZONTAL CABLE SYSTEM - [Simplifies From Design To Installation](#)

- Pre-spaced riv-nuts to assure even spacing and faster installation
- Pass-through post designed for level and stair applications
- Pre-drilled line, corner or end post sleeves for rapid and even installation
- Pre-drilled intermediate baluster designed for level and stair applications - available in black and anodized
- 100% right hand fitting operation
- No angle drilling for angle or stair installations

Termination
Riv-Nut Post

FAIRWAY PROPRIETARY STRUCTURAL POST WITH RIV-NUTS

- Robust structure that supports proper tension to meet and exceed code requirements
- Pre-spaced and pre-drilled riv-nuts assures even spacing and faster installation
- Includes leveling flange kit for all surfaces, even concrete
- Post design accommodates either end, line or corner installations
- Deck mounting kit is available

Works with

Horizontal Cable Installation Pro Tips

A cable railing installation may seem complex to the inexperienced installer. However, when following a few tips and techniques, contractors can ensure a safe and secure installation with Fairway's cable railing system.

Below are a few highlights on how to prevent possible cable wire slippage and other matters of installation.

CUTTING CABLE WIRE

Avoid using tools that are not designed for cutting metal cable wire rope.
Hand tools such as a lineman's side cutter will fray or unravel braided cable wire. This can inhibit the locking jaws within the fitting to securely engage the wire and result in cable slippage within the fittings.

Use a metal cable cutting tool to cut cable wire rope.

A metal cable cutter tool is recommended for cable rail installation. This tool is designed to create a round and compact wire cut pattern that will properly engage the locking jaws within the fitting, providing the installer with secure tension.

Metal cable cutting tool specifications:

Steel Wire Rope - up to 5/32"

Stainless Wire Rope - up to 1/8"

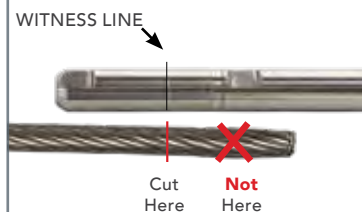

Mild Steel Rod - up to 1/8"

Use the "witness line" when cutting the cable wire rope.

At the tensioning fitting, use the witness line as a guide to cut the length of the cable wire.

Do **not** use the line where fittings connect. The length of the cable wire will be too long and you will not be able to secure proper tension.

RIV-NUT POST - CABLE FITTING INSTALLATION

Refrain from using an impact drill to install cable fittings.

Do not use an impact drill when installing the machine studs into the riv-nut structural post. The use of an impact drill can cause the riv-nut to break loose and spin inside of the structural post. This will cause a failure in tension across the cable.

Two types of installation methods are recommended:

1. Screwdriver with a 3/16" hex head bit
2. By hand and hand-tighten

Using either method will adequately secure the machine studs allowing you to properly tension the cable.

Machine Stud Fittings - Insert "stop" side into riv-nut post.

Install the "stop" side of the machine stud fitting into the riv-nut post.

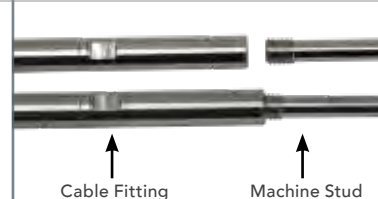

Horizontal Cable Installation Pro Tips

RIV-NUT POST - CABLE FITTING INSTALLATION (Continued)

Cable Rail Fittings - Cover only half of the machine stud threads.

When installing cable rail fittings, hand thread the fitting (3-4 turns) leaving half of the thread exposed on the machine stud. This will allow for travel between fittings resulting in proper tension.

Stair Clevis Fittings - "Broad" end attaches to riv-nut post.

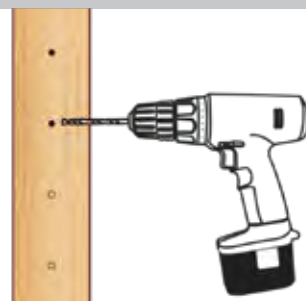

Install the "broad" end of the stair clevis fitting into the riv-nut to allow for proper tension.

WOOD POST - CABLE FITTING INSTALLATION

Pre-drill wood post

Pre-drill wood post using a 1/4" drill bit, before installing lag screws into posts.

Refrain from using an impact drill to install lag screws.

Do not use an impact drill when installing the lag screws into the wood post.

Two types of installation methods are recommended:

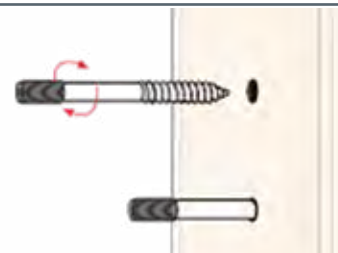

1. Screwdriver with a 3/16" hex head bit
2. Non-Impact Drill with a 3/16" hex head bit

Using either method will adequately secure the lag screws and allow you to properly tension the cable.

Lag Screws - Insert until threads are no longer visible.

When installing lag screws into wood post, insert until screw threads are no longer visible.

Cable Rail Fittings - Cover only half of the lag screw threads.

When installing cable rail fittings, hand thread the fitting (3-4 turns) leaving half of the thread exposed on the lag screw. This will allow for travel between fittings resulting in proper tension.

Horizontal Cable Installation Pro Tips

CABLE WIRE

Not all cable wire is created equal.

Where a 3/16" cable would appear to easily fit into the opening of the cable fittings, the locking jaws within the fittings are specially designed for 1/8" cable wire. Anything over 1/8" diameter will not allow the jaws to open or close properly, resulting in a bundled wire or cable slippage within the fittings.

Avoid using "right hand lay" cable wire.

Fairway's cable rail fittings are designed to respond to "left hand lay" wire. The use of "right hand lay" cable wire will cause fraying or unbraiding of the cable wire, resulting in a bundled wire or cable slippage within the fittings.

Avoid transfer of tool lubricant or cleaning solution onto cable wire.

Cleaning or lubricating tools is customary; however, it is extremely important to make sure to remove any remaining residue. Lubricants can transfer to the cable wire and create slippage within the fittings.

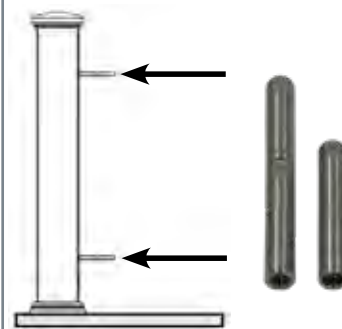

POST & RAIL INSTALLATION

RIV-NUT POST - Install a cable fitting in the top and bottom row of each post.

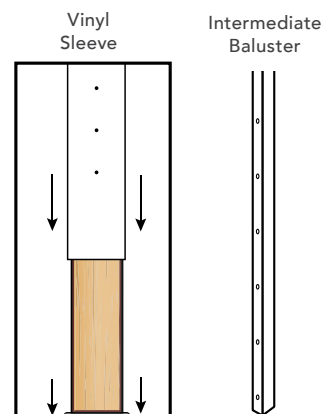

Once you've installed the structural posts and sleeves, install a cable wire fitting in the top and bottom row, **before** attaching your top and bottom rail brackets to each post.

This will allow you to align the post sleeve pre-routed holes with the structural post holes and accurately position the cable fittings to ensure proper tension.

WOOD POST/ NO SLEEVE – Use a pre- drilled vinyl sleeve or intermediate baluster as a drill template.

When using a wood post without a sleeve, cable fitting patterns can be achieved by simply sliding a pre-drilled vinyl sleeve over the wood post or by using an intermediate baluster and marking the hole pattern. Either technique can be used to mark end, line or corner wood posts.

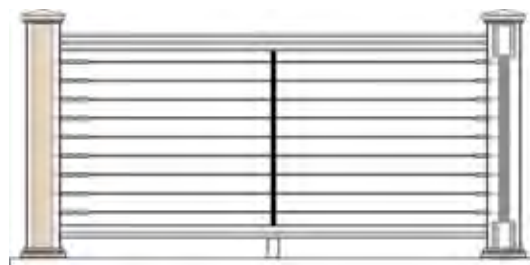

Horizontal Cable Installation Pro Tips

POST & RAIL INSTALLATION (Continued)

Rail installation should always include a bottom rail.

Our cable rail system is designed for a top and bottom rail with 9 rows of cable wire for a 36" high system. Bottom rails play an important part in the stability of the railing as they add support and allow for a foot rest when leaning against the railing.

CABLE WIRE INSERTION

Avoid inserting cable wire at an angle.

Our fittings are designed with a spring-loaded jaw which automatically locks the cable into place when the wire is inserted on center. In the event the wire is installed at an angle, the braiding can get caught on the outside of the jaws and not lock into place.

To easily insert the cable wire into the tensioning and non-tensioning fittings, use the cable install tool as part of the three-step process.

Step 1

Once the tensioning and non-tensioning cable fittings are installed, carefully insert the cable install tool into lockjaw fitting and push down until the tool bottoms out. If done correctly, you will feel resistance from the spring-loaded jaws.

Step 1

Step 2

Insert the cable wire into the fitting "on center" until you hear the cable "click" (lock) into place.

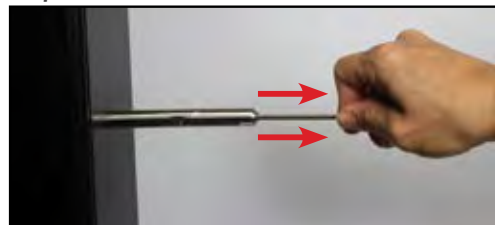

Step 2

Step 3

Once cable wire is inserted, remove the cable install tool from fitting and pull slightly on the cable wire to ensure proper wire engagement within the fitting. This final step will provide you with the resistance needed to secure proper tension.

Step 3

P300 Series Cellular PVC Horizontal Cable Kits

FOR STEEL POSTS, CAPS, TRIM, AND GATE COMPONENTS, SEE PAGE 26.

LED LIGHTING

EASY PLUG AND PLAY LED SYSTEM

Transformers simply plug into a receptacle - no need to run lengthy wire from transformer to end of project. System is constructed with male and female connectors - eliminating the hassle of cutting or splicing wires.

WEATHER RESISTANT

Self-sealing connectors are designed to resist harsh weather conditions.

DAISY CHAIN ENGINEERED

Each light has been engineered to connect to the next, allowing for effortless installation.

SOFT WARM LED LIGHT

Designed to match landscape industry standards.

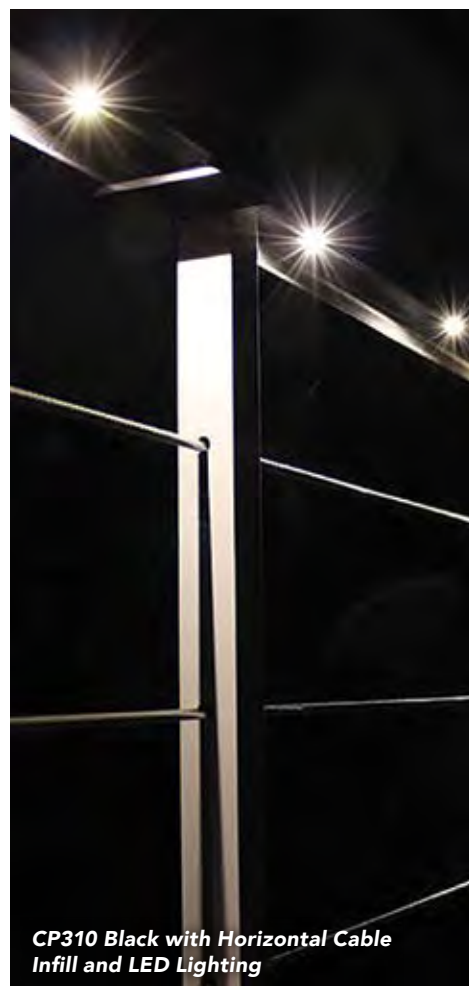

CHOOSE FROM 5 LIGHTING STYLES

- Post Cap Lights
- Sconce Lights
- In-Deck Lights
- Pin Lights
- Riser Lights

OPTIONAL FEATURES

- Timer & Dimmer Switch
- Bluetooth Switch

Works with

CP310 Black with Horizontal Cable Infill and LED Lighting

LED LIGHTING FIXTURES

J - In Deck Light, Includes Both Black and Brushed Bronze Accent Collars Uses 0.24 Watts Dual Cord - 18" Length	N/A	N/A	901452 \$35.30	N/A	N/A
K - Stair Riser Light, Uses 0.26 Watts Dual Cord - 18" Length	N/A	N/A	901453 \$35.30	N/A	N/A

***To select the best transformer (page 155) for your installation, multiply the wattage usage of each fixture by the quantity of fixtures to be installed to calculate your total wattage requirement. The wattage rating of the transformer must be greater than the sum of the fixture wattage being installed.**

****All of these fixtures can be continuously daisy chained in any order with the exception of the Strip Light (I), which cannot be daisy chained and must be used with a 2 in 1 splitter (page 155) at the end of the chain.**

LED LIGHTING TRANSFORMERS & ACCESSORIES

36 Watt Transformer & Accessories		
A - 36 Watt DC Transformer 10 ft Plug-in Cable		901479 \$88.75
B - Photocell Switch for 36 Watt Transformer, On at Dusk, Off at Dawn 29" Length, End to End		901480 \$36.38
C - 10' Extension Cable for 36 Watt Transformer, Used to Reach Direct Sunlight for the Photocell		901481 \$30.27
D - 20' Direct Cable to Light for 36 Watt Transformer		901482 \$50.76
