

# URETHANE PRODUCTS - AN OVERVIEW

Fypon millwork products are used on both the interior and exterior of residential and exterior of commercial projects. Fypon polyurethane products provide superior performance over many other materials given their inherent properties. Polyurethane is a closed-cell product, making it resistant to moisture and insects. It resists rotting, warping, cracking and peeling, as well as crumbling and deterioration.

## PRODUCT CATEGORIES

- Window & Door Trim
- Mouldings
- E-Vent™ Systems
- Decorative Millwork
- Louvers & Gable Vents
- Balustrade Systems
- Porch Posts, Columns & Post Wrap

## FEATURES

- Precision molded from high-density polyurethane
- Lightweight, making the product easier to handle and install
- Closed cell structure, making it resistant to moisture and insects
- Pre-primed surface ready to faux finish, stain or paint
- Deliver the beautiful, authentic details and rich textures of finely finished wood, rugged timbers and classic stone accents
- Has the look and feel of traditional building materials without the maintenance

## ORDERING

All product sales go through dealers in your area. To locate a dealer in your area, visit our online Dealer Locator or call 1.800.446.3040. If you would like to become a Fypon distributor, visit our Becoming a Distributor section.

## INSTALLATION

- Each piece has a consistent quality and finish, which require no sanding, priming or sealing
- Pieces can be sawed, drilled, nailed and glued like wood
- Significantly lighter in weight than wood or plaster products, saving time and labor on the job-site
- Use standard woodworking tools for installation

## PAINTING

Fypon products come double-primed with an exterior grade coating. The pre-primed surface is ready to stain or paint - no sanding or additional priming needed. The product should be painted with a high quality latex paint. Pieces can be painted any color the homeowner desires, and can also be faux painted and marbled for more decorative looks. Please contact your local paint supplier for more details on painting specifications for Urethane surfaces.

## ADDITIONAL SERVICES - PROJECT QUOTING

Fypon offers superior service from completing quotes for standard or custom architectural millwork to using a specialized construction software to provide digitized takeoffs from your construction prints.

- Request for quote - we provide you with pricing for on part or multiple parts to meet the needs of small projects
- Large project quoting - we provide you with quotes for large projects from single home to commercial buildings

- Digitized Takeoffs - using specialized software, we can get you the quick and accurate quantity takeoffs you need to complete your project.
- Project Quote Package - Our customized project quote packages for large projects put all the pertinent information together in an easy-to-understand format, including quality pricing, drawings on standard or custom parts, breakouts that show parts in context of the prints, installation information, warranty information and more.

## ADDITIONAL SERVICES - DECORATIVE CUSTOM PRODUCTS

If your project requires a shape, size or profile that you don't see in our catalog, Fypon can bring your construction dreams to reality.

Whether you need an authentic replica for a historical restoration or you're faced with a unique or unusual architectural situation, we have the design and production capabilities to turn your sketch and dimensions into almost any millwork or trim product imaginable.

We will review your custom project to arrive at the best solution, working with your plan to create a CAD drawing and produce a new custom part for your project.
