

Solar Power, Wind Power or just the plain **Power of Physics**, Lomanco Vents have been Going Green from the get go!

- ▶ The entire Lomanco product line is geared toward saving energy, increasing efficiency, and enhancing the performance of your home's building products.
- ▶ Use Lomanco ventilation products to help keep the attic temperature as close to the outside temperature as possible. Less energy is required to cool your home.
- ▶ Lomanco ventilation products help keep the moisture level in the attic to a minimum. The performance of insulation is enhanced, reducing the consumption of heating oil, gas and electricity.
- ▶ Lomanco ventilation products are designed to prolong the life of your home's roof shingles.
- ▶ Lomanco ventilation products work on both new and existing homes.
- ▶ Lomanco ventilation products reduce energy bills.

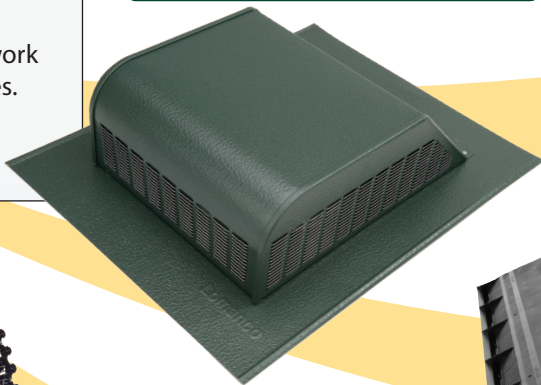

Omni Solar Vent™ - Use **Solar Power** to cool your attic.

Whirlybird® Wind Powered Turbine - Use **Wind Power** to cool your attic.

Lomanco static vents, utilize the **Power of Physics** (hot air rises) to cool your attic. A balanced ventilation system will provide cool air through your lower intake vents and remove hot air through your upper exhaust vents.

Lo-Omniridge® and OmniRidge® - Lomanco's Omni series vents utilize **Wind Power** coming from any direction to increase their efficiency to help cool your attic.
