

LOW-PROFILE RIDGE VENTS

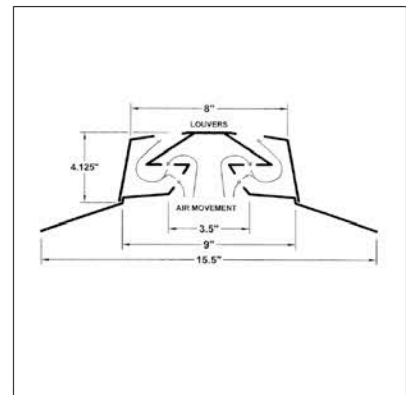

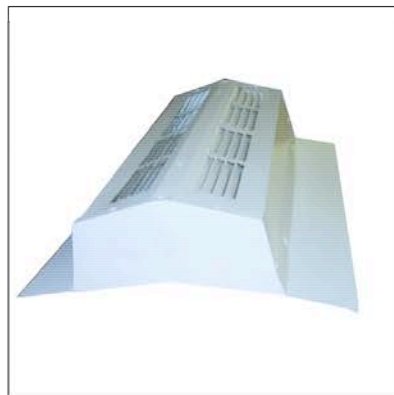

Low Profile Ridge Vents from CannonBall:HNP allow you to design a whole building ventilation system tailored to your building's purpose. Available in colors to match most buildings and air flow ratings to match building design requirements. CannonBall:HNP Low Profile Ridge Vents are built to allow the maximum amount of air flow with minimal size, and at an affordable price. All CannonBall:HNP Low Profile Ridge Vents are fully assembled and come complete with flanges, end caps, and bird screens. Recommended for agricultural and light commercial buildings with unfinished ceilings and interiors only.

| Model 220 |

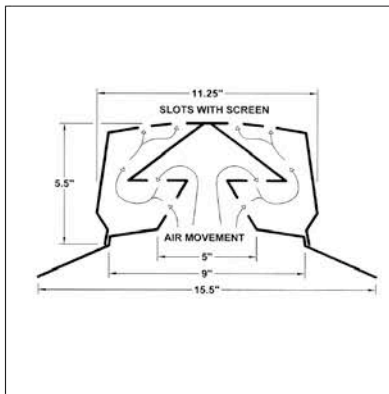

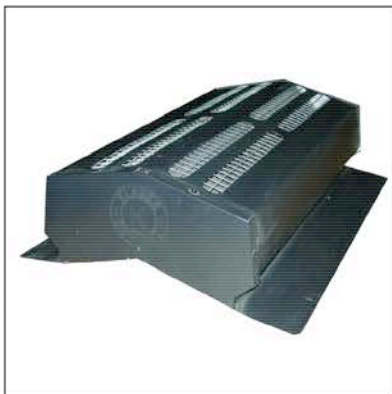

Heavy duty 29 ga. steel construction with internal bracing and rain diverter. Includes end caps and adjustable flashings pre-assembled. Available in a wide variety of colors and can be equipped with an optional polycarbonate roof for ambient lighting.

| Model 370 |

Manufactured of 29 ga. pre-painted steel with louvered top and internal bracing and rain diverter. Available in a wide variety of colors, the Model 370 comes pre-assembled and includes end and connector flashings.

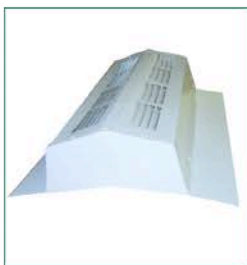

| Model 400 |

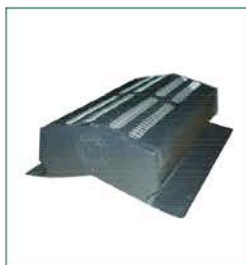

Manufactured of pre-painted hot-dipped galvanized steel. Screen pre-installed to prevent bird intrusion. Internal deflector keeps out rain and snow. Ready to install with two end flashings and one connector flashing per unit.
