NEVER-MISS® COLORING GEL

Coloring Gel for Touch Up & Tracking

A breakthrough formula

Never-Miss Coloring Gel is a breakthrough formula for tinting drywall joint compound and spackle providing better visibility and limiting paint flashing. Never-Miss is used for tracking job and worker progress during final touch up, patches and repairs. Never-Miss is specifically formulated with a built in primer and color indicator designed to ensure a superior finish every time.

Simple to use

Never-Miss Coloring Gel can be applied using the traditional hand method using automatic tools, or sprayed on. Never-Miss color rises to the top as the joint compound dries and easily sands away making locating imperfections a snap.

Never-Miss is ideal for touch ups easily guiding the finisher back to areas that need sanding or reworking. No special lighting is needed. Priming patched areas is eliminated because primer is built into Never-Miss.

Use Never-Miss to:

- ▶ Eliminate flashing
- ▶ Save time and money
- ▶ Highlight touch ups
- ▶ Quickly locate finish flaws
- ▶ Reduce call backs
- ▶ Increase productivity
