

# BRISA

Retractable Screen Door

EASY 30-MINUTE  
INSTALLATION

A FRESH APPROACH TO FRESH AIR

## Discover Brisa's Fresh Approach.

Brisa Retractable Screen Doors offer homeowners a fresh approach to traditional screen doors. Like hinged screen doors, Brisa allows fresh air to circulate into the home. But Brisa does that without all the banging and slamming and in-the-way hassles of a traditional hinged screen door.

Brisa's full-view screen also fully retracts when not in use so it doesn't get in the way.

It's there when you need it and out of sight when you don't.

## More Gliding. Less Slamming.

The innovative E-Z Glide System provides a smooth and steady screen operation.

The ergonomically designed latch/lock handle offers simple and secure one-hand operation and provides confidence that the screen will stay closed to keep pets and children safely inside while keeping insects and debris out.

# Durability has never been so beautiful.

A symmetrical design and neutral material selections coordinate with the brick or wood molding of your home's architecture.

Durable painted surfaces and rust-free aluminum housing and track require no maintenance.

Outer face-mount installation creates a full opening for fresh air circulation, unobstructed view, and full pass-through space without the intrusive housing or track associated with in-jamb installed retractable screen doors.

Subtle stripes woven into the screen provide visual cues to help prevent screen walk-through-- especially on days when bright sunlight can seem to make the screen "disappear."

## If you have 30 minutes, we have the solution.

Brisa is smartly designed with ease of installation in mind. No metal cutting is required and only one power driver tool is needed to install five components in only 30 minutes.

### Assemble

The simple-to-install Quick-Snap Track can be snapped into the screen housing and adjusted to proper length without cutting for doors 32"-36" wide.\*

### Place

Outer face-mount installation helps ensure easy-to-square installation while providing maximum air flow and an unobstructed view and pass-through.

### Secure

Secure screen onto door frame with one tool and eight screws.

\*(For door widths 28"-31.5", two simple cuts with a hacksaw are required)

Quick-Snap Track

Retractable Screen Doors are installed over an entryway so the entry door can be opened and fresh air can circulate through the retractable screen door and into the home.
