

Dialogue Layered Glass

Dialogue Layered Glass

Playful interaction and dynamic privacy

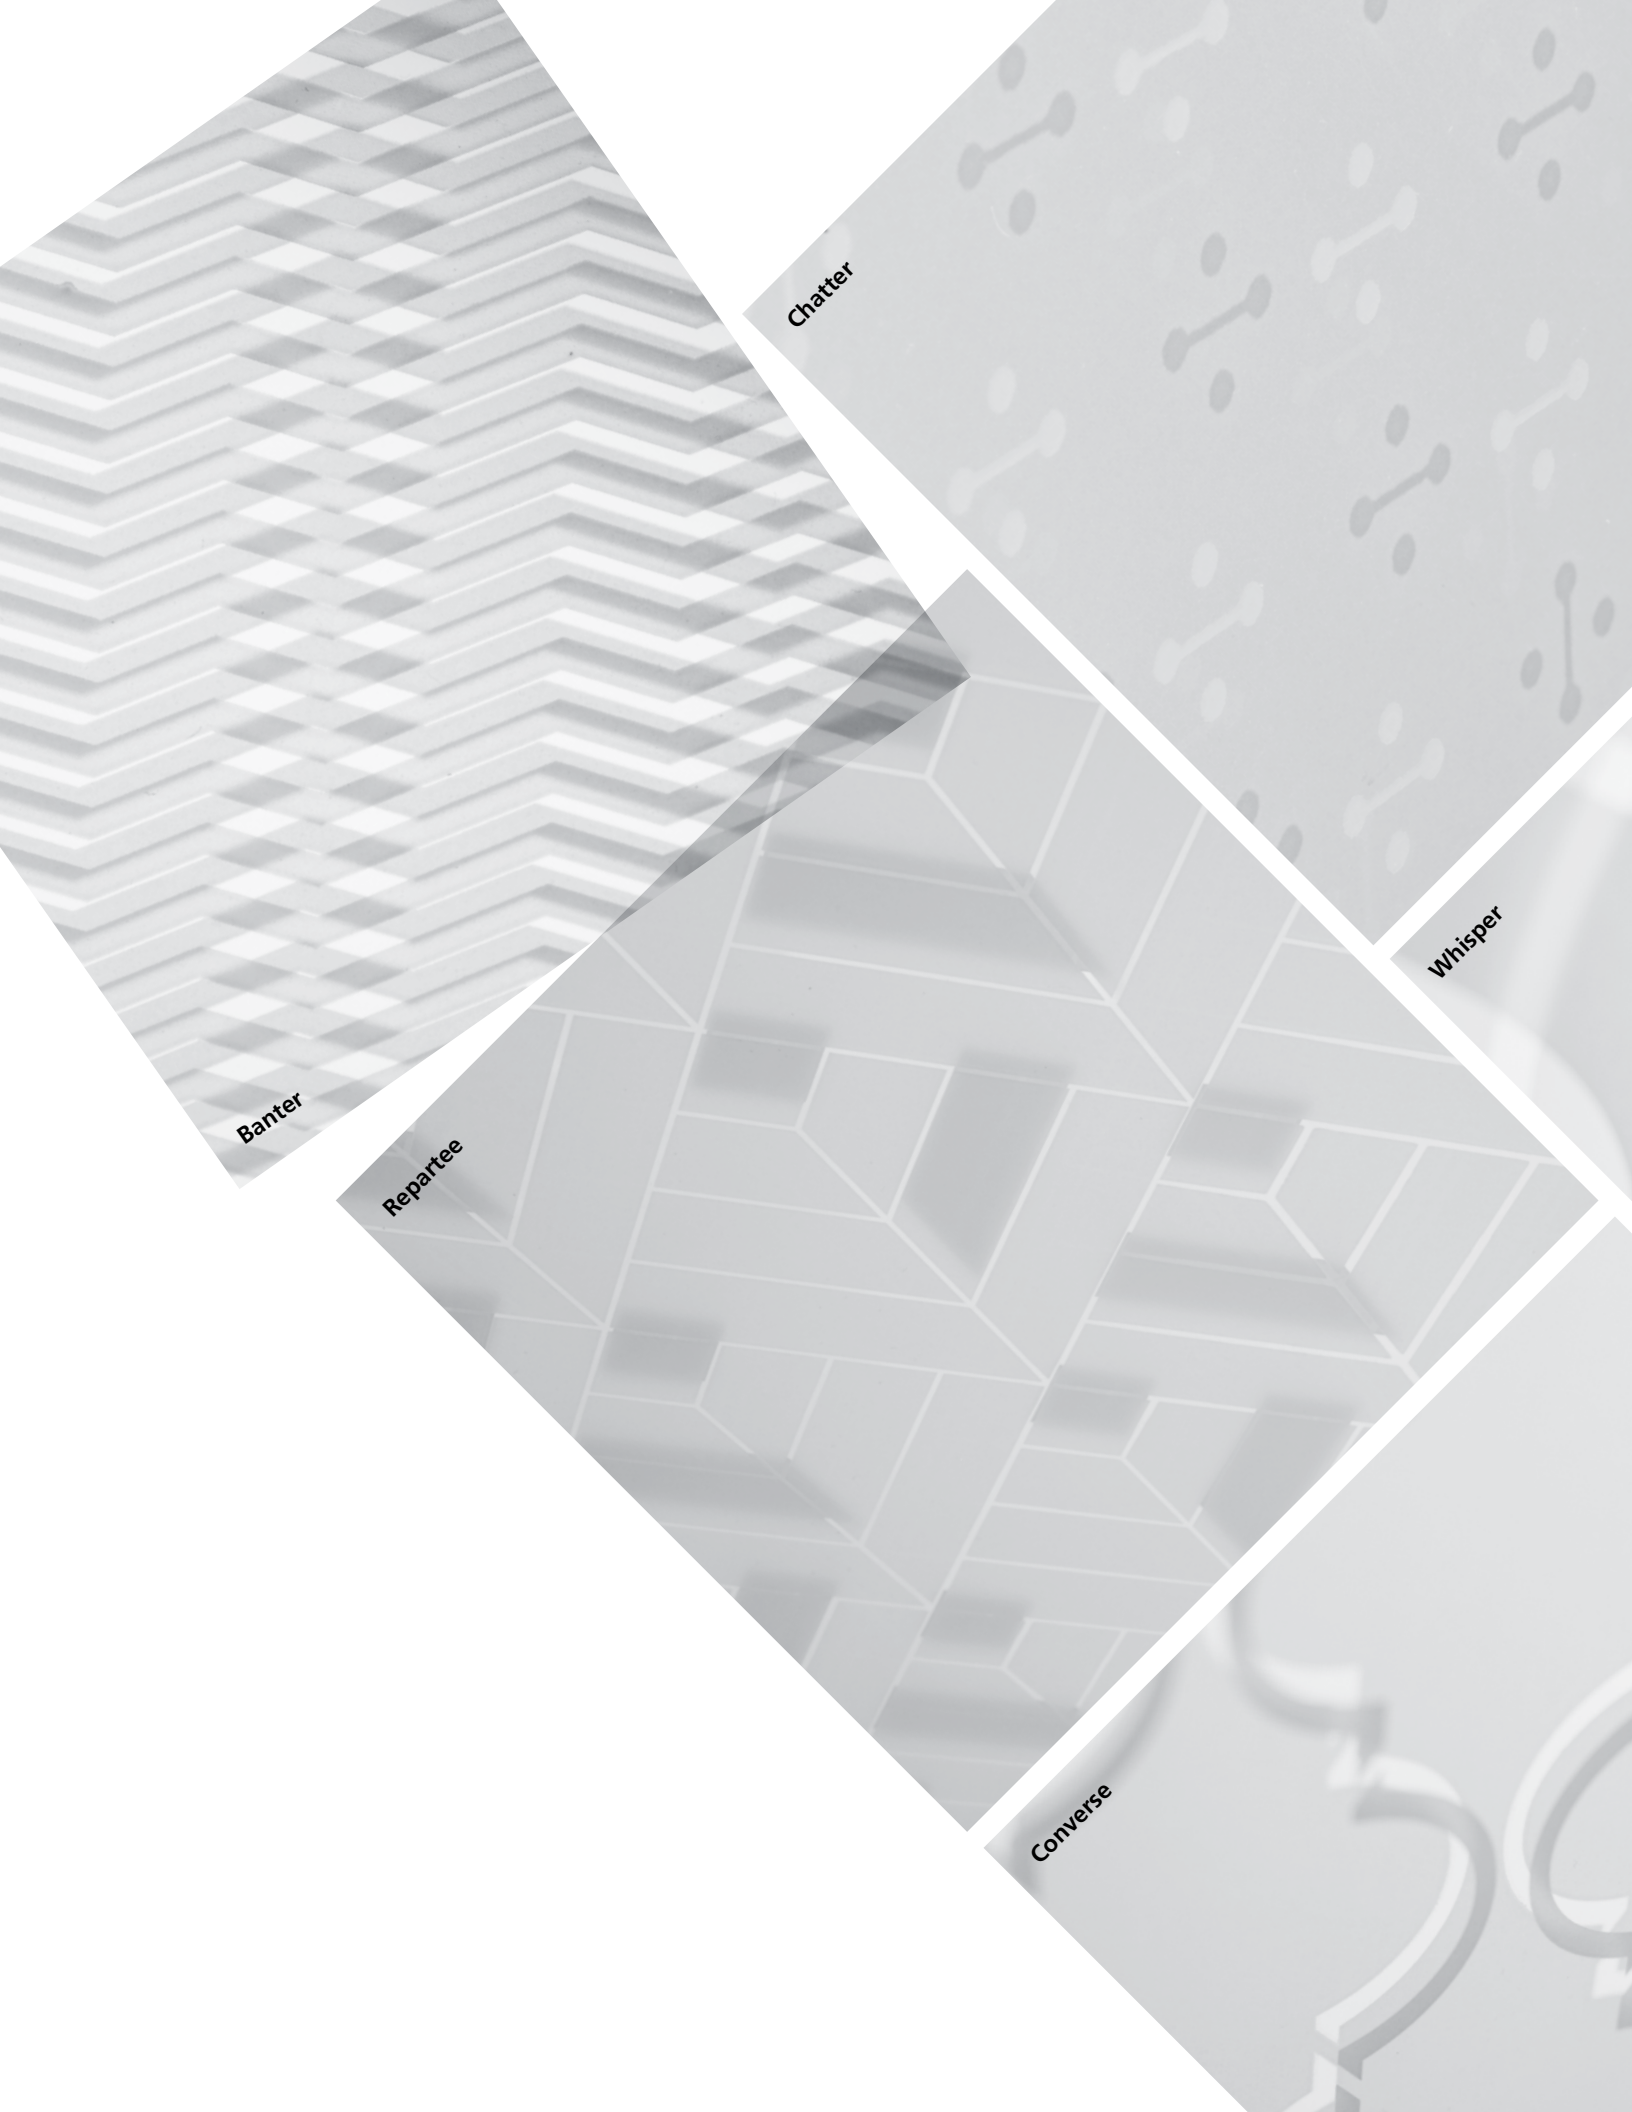

Dialogue takes on a personality of its own as layers of glass interact with one another, with light, and with movement. Each of the line's six ceramic frit patterns change form and move as light or a person's vantage point changes. Patterns come to life, shapes are revealed, and shadows dance as light and movement engage in a dialogue with the glass. Dialogue layered glass creates dynamic privacy that changes, just as the doorglass patterns do, with light and proximity.

Subtle beauty and a surprising twist

Dialogue complements a range of architectural styles and design aesthetics with doorglass patterns offering privacy and translucence. Ayako Takase and Cutter Hutton, principals of industrial design firm Observatory, created each of Dialogue's designs with an etched, subtle pattern on the outer glass layer that allows the home's architecture to take center stage while the interior layer features a bolder, pronounced pattern.

Layered Glass

Banter’s small-scale pattern of overlapping diagonal lines creates a woven design that zig-zags across layers of doorglass. From a distance, the fine “threads” give the appearance of fully frosted, textured glass that provide a low-to-medium privacy range.

Layered Glass

What at first appears to be cut glass is a stencil design that hints of keyhole arches common in Moroccan architecture. The relationship between Converse's clear and frosted glass layers creates striking shadows and a high privacy range.
