E2107

Like the OWT Post base, the OWT Lite is beautifully designed and features some of the same patented features as the Original. It also features a 1 inch offset to meet international residential building code for installation using non-rot-resistant lumber. OWT-Lite products are simplified versions original OWT products designed to meet minimum load requirements, and offered at a lower price point.

Laredo Sunset - 6-8" Joist Hangers Just what I needed!

I'm so happy I found these fasteners for our pergola. I was searching online for something with a little more panache than galvanized hangers and fasteners and I found these. They're heavy duty, easy to assemble and they increase the value and look of our pergola. I couldn't be happier to have these attached to our house.

10 REASONS **OZCO** is the GREATER Choice In Building Materials

PATENTS

- OZCO has been granted 10 US patents on its products with more pending.
- OZCO invests in protecting it's intellectual property.

- Check out our 100's of product reviews, across industry leading sources print & digital.
- Thousands of DIY and Pro submitted project pictures, posts and engagement.
- Featured on several popular HGTV & DIY home improvement shows.

- Custom cut steel is expensive in part to the time consuming manufacturing process and simply doesn't last as long.
- What is the cost per pound? Take the cost/weight and you will quickly see that OWT hardware has the lowest cost per pound.
 - Don't pay more for less With OZCO products that is never the case.

ADJUSTABLE

- Lumber dimensions vary tremendously from rough cut, smooth, reclaimed and so on, combined with the many types of species utilized with OWT connectors.
- Other connectors on the market require bending of the brackets or the size of material to be known before placing orders. Neither option is ideal OWT connectors are the answer offering truly adjustable on-site installation with ease.
- A complete and tight connection produces the highest level of strength and performance in any installation.

HOT DIPPED GALVANIZED

- Not all galvanized is created equal, pre-galvanized steel does not perform as well as HDG.
 Galvanizing after production ensures all areas of the steel is uniformly coated with zinc.
- Same process used for national highway guardrails, an area subjected to some of the harshest environmental conditions.

POWDER COATED

G-PC

- OWT hardware features high grade exterior power coating.
- PC performs better than liquid paint typically used by steel fabricators.
- All of the OZCO black powder coated hardware is truly uniform providing consistency & performance for the entire project.

THICKER STEEL

- The thicker the steel is the stronger the connection will be.
- OWT steel thickness is scaled to be more pleasing to the eye.
- Pays homage to the history of this type of timber construction.

e. jon. (3mm

THE INDUSTRY LEADING

Provider of high quality building & design content for AEC professionals throughout North America.

♣ lbs kg TESTING / REPORTS

- OWT hardware is not only attractive but it is also structural.
- 📗 We could manufacture our products for a lower cost but our goal is to make our products perform above industries standards.
- Drawings and load data listed on ARCAT for easy access.

KITS & PACKAGING

- At OZCO we are builders too, so whenever possible we include the necessary hardware to keep your list short, save time & money.
- Well packaged to remain in excellent condition from the store to the job-site.
- Packaged in job sized quantities for DIY and Pro.

TIMBER BOLTS & SCREWS

- OWT Timber Screws feature performance with strength that is second to none in a wide range of lengths for all types of projects.
 Screws can be used successfully when the force is predominantly shear load.
- Don't forget to use our Heavy Duty Washer on wood to wood connections for added strength and style.
