## **Re: Technical Support on the Paintability and the Fungi Resistance of GrabberGard Caulkings and Spray**

The complete line of Grabber's firestopping caulking and sprays are latex base (water-based) and as such are chemically compatible with latex based paints. When painting over the GrabberGard firestopping products is required, allow the product to cure prior to the application of paint.

GrabberGard firestop caulking and sprays have been tested for fungi resistance in accordance with ASTM C-1338-00. At the conclusion of these tests, the complete GrabberGard firestopping line of caulking and sprays was determined to be fungi resistant.
