NOT ALL PINE DOORS ARE CREATED EQUAL.

AUTHENTIC PONDEROSA PINE, FROM PACIFIC NORTHWEST FORESTS. THERE IS NO COMPARISON.

Woodgrain strives to offer the best craftsmanship available in the industry and has been making Authentic Ponderosa Pine doors in Nampa, Idaho since 1985. Woodgrain is one of the largest manufacturers of interior pine doors and mouldings in the United States.

Woodgrain's policy is to responsibly manage and thoroughly evaluate all of our environmental influences and their consequences. This includes being watchful of our example and stewardship as a leading corporation in a natural resource dependent industry.

PONDEROSA PINE DOORS by WOODGRAIN DOORS

Ponderosa Pine is one of America's most abundant tree species. It has straight, uniform grain with minimal amounts of reddish-brown heartwood. The sapwood has wide growth bands, which are honey-toned or straw-colored.

Due to its lighter natural color, Ponderosa Pine lends itself to staining and allows the stain color to stay close to its true color.
